The have gone to the doctor/ER already this morning but the person asked about typical symptoms, that's all. The person speaking for the group of responders indicated that the Doc said that some of their symptoms did not match with the MSD sheet provided by the company

All,

Bryant is spot on. If responders have a treating physician, or private physician or local healthcare provider they can reach out to the Poison Control for medical treatment support. PCC also have access to ACMT who can also support. 1 800 222 1222.

Have cc'd Patrick.

Also, remember that the poison control center can assist also.

I need someone to reach out to Patrick Y to discuss potential effects of exposure to the burning peroxide. Some of the first responders that got affected this morning are concern with symptoms still lingering (sore throat, a few ulcers in her mouth) plus some initial symptoms right after exposure.
